

## APS Master Data Protocol

**Study:** The American Periphenomenal Survey

**Unit:** The Archive | **Region:**  Cascadia (Reg10)

**Status:** ACTIVE REFERENCE | **Version:** 3.2 (Schema Aligned)

### PART 1: THE ANALYTICAL FRAMEWORK

*High-level logic used to classify events.*

#### 1. The Strangeness Index (Calculated)

A calculated integer (0—10) derived from the sum of all `phenom_` flags.

- **0-2 (Low):** Vague, distant, or strictly visual lights.
- **3-5 (Medium):** Multi-sensory (Sound + Visual) or physical effects.
- **6+ (High):** "The Oz Factor," Missing Time, or Close Contact. **(Trigger Field Intercept).**

#### 2. Event Typology (The "Type" Code)

*Assigned by Research Analyst during Phase 4.*

- **TYPE\_I (Liminal/Spatial):** Event defined by location (Roads, Doors, Fog). Reality feels "thin."
- **TYPE\_II (Crypto-Biological):** Encounter with an unknown biological entity.
- **TYPE\_III (Aerial/Technical):** Lights in sky, metallic craft, drone-like behavior.
- **TYPE\_IV (Psychic/Noetic):** Internal experience (Dreams, Premonitions, Synchronicities).
- **TYPE\_V (Poltergeist/Material):** Physical movement of objects, knocks, apports.
